

**Lightpro 12-volt outdoor lighting is a Techmar brand uniquely created for the professional.**

Using a specially designed connector, Lightpro lights are extremely easy to connect.

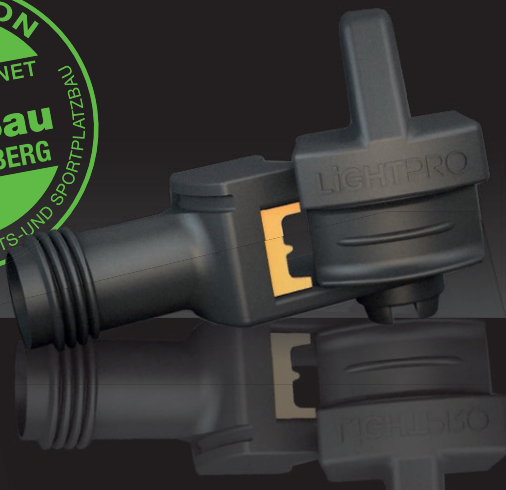

Lightpro offers a 5-year warranty and a through-life service. Components and light sources are replaceable and always in stock. Products are thoroughly examined and tested inside the factory and upon entering our warehouse.

All products are in stock at Techmar in Hengelo, the Netherlands. Concerning POS (Points of Sale) Techmar offers a modular presentation of 2 meter (or 2 x 1 meter back to back). Of course we can also help you design a show garden.

**Techmar is a 12-volt outdoor lighting specialist and develops its products in-house.**

Ideas are turned from sketches into technical drawings and manufactured into prototypes.

Our regular partners use our moulds to produce according to prescribed specifications. Naturally, all our products meet the latest (European) requirements in the fields of safety and environment.

**GaLaBau Innovation Medal**

During the GaLaBau trade fair 2016, Europe's leading fair for garden and landscaping in Nürnberg (Germany), the new Lightpro Connector has won the Innovation Award.
